Distribution Solutions

How we help

Reduce costs by streamlining your inventory management processes. Collect and use accurate inventory data in real time, improve warehouse efficiency.

Wholesale distributors often find themselves squeezed between increasing customer demands, competitive pressures, and the accelerating spread of manufacturers across the globe. Tight margins and the high cost of excess inventory make cost control and efficiency critical, especially for small to midsize companies that can't afford to make mistakes.

- Deliver outstanding customer service
- Improve supply chain process
- Improve inventory management
- Areas of expertise include EDI, Bar coding, Wireless warehouse solutions.
- Automated and integrated packing and shipping.
- Ecommerce solutions for customer self service and sales person access.
- Business Partner and Employee Portals
- Relationship Management
- Advanced Planning & Procurement

Manufacturing Solutions

How We Help

Become more responsive to customers and improve business performance. We supply you with tools to manage manufacturing processes such as production orders, bills of material, supply planning, and capacity requirements planning.

Successful job management requires an up-to-date overview, detailed planning and the ability to carry out follow-up analyses based on objective data. The Jobs application area enables detailed accounting and planning for all costs and billings for a project or job.

Key Benefits

- Take advantage of new revenue opportunities
- Provide more responsive customer service
- Improve business performance from shop floor to bottom line
- Analyze short and long-term profitability of job activities.
