AccellosOne Ship

Integrated Multi-Carrier Shipping System

Automate From Order Entry Through Delivery

Achieving a streamlined business process from order entry through delivery is becoming more challenging by the day: rules and regulations from the major carriers (FedEx, UPS, USPS) are in a constant state of flux, LTL rates are all over the map and customer expectations continue to expand in today's fast-paced global business climate. You can use the carriers' systems, but that puts your personnel squarely in charge of determining the lowest cost means of delivery.

AccellosOne Ship is a multi-carrier shipping system designed flexibly to fit anywhere in your organization:

- Integrated into an automated, high volume warehouse environment
- Standalone within your mailroom
- Running from your user's desktops – either standalone or integrated with your ERP

The system was built using the latest in Microsoft .NET and Silverlight technology, designed for scalability, and tuned for maximum performance in high volume applications. AccellosOne Ship allows you to maximize cost savings by leveraging carrier selection with the multi-carrier rating engine.

AccellosOne Ship helps you reduce your shipping costs, improve your shipment reliability, track every shipment and maintain valuable key performance metrics. With AccellosOne Ship, you can improve your customer service while driving out operational costs.

Powerful Carrier Rating Server

At the heart of any multi-carrier shipping system is the rating server. AccellosOne Ship is no exception. Our server is designed for high volume, reliable shipping and comprehensive carrier compliance – with the flexibility to scale from a single workstation to an enterprise level solution with multiple servers, load balancing and high availability to meet even the most advanced requirements.

Extensive Carrier Compliance

AccellosOne Ship is certified by all the major parcel carriers. It has passed the USPS MAC certification and is a registered Confirmation Services and Express Mail Manifesting Vendor application.

AccellosOne Ship provides a UPS Ready solution for worldwide parcel shipping as well as UPS Freight and UPS Mail Innovations extensions.

And, AccellosOne Ship doesn't stop there! It is a FedEx Compatible Solution, supporting worldwide shipping of FedEx services, including FedEx Freight and FedEx SmartPost.

Plus DHL, Canadian carriers, LTL and Regional carriers like Spee-Dee!

Intuitive User Experience

It's not enough to be robust – you have to be easy to use. The innovative user interface is delivered in a browser, but acts like a familiar Microsoft Office solution that you use every day. From a simple means to rate shop and ship to end of day close and paperwork creation, AccellosOne Framework makes it easy to train your team to take advantage of your AccellosOne Ship solution.
