

Cloud vs. On-Premises Business Management Systems

Microsoft Dynamics 365 Business Central is the next generation of Dynamics NAV available either as a Cloud or On-Premises Business Management ERP System. Learn about the pros and cons of deployment options to determine the right fit for your company. We are available to answer all of your questions.

Microsoft Dynamics 365 Business Central Cloud Deployment- "In-The-Cloud" ERP simply means that business data and systems are stored elsewhere via internet connections.

Microsoft Dynamics 365 Business Central

Pros:

- No Infrastructure to Maintain
- Updates are Continuous
- MS AppSource Add-On Functionality
- Integration with other Cloud Systems
- Much Lower Initial Set Up Costs

Cons:

- Internet Reliant
- Possible Regulation Restrictions
- No "Ownership" of ERP System
- Potential Storage Costs

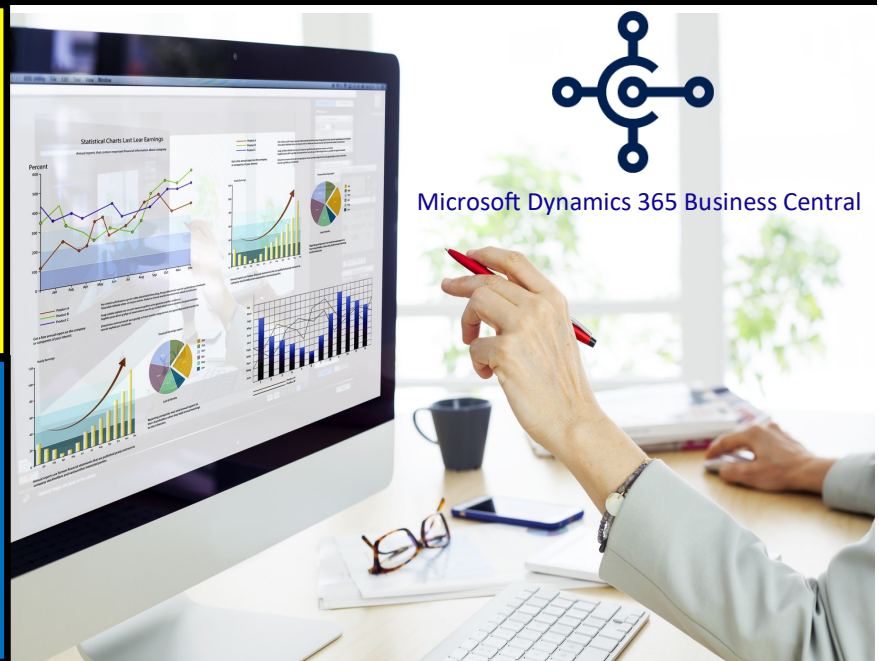

Microsoft Dynamics 365 Business Central On-Premises Deployment- The system and business data are stored in-house via server(s).

Pros:

- Utilize your Existing Infrastructure
- You Own the ERP Licenses
- Not Internet Dependent
- Control over Updates
- No Additional Data Storage Costs

Cons:

- Limited Cloud-Based Services
- No Key Business Updates
- Higher Set-Up Costs
- Technology Becomes Outdated

Microsoft Dynamics 365 Business Central

Questions? There are advantages and disadvantages to both ERP system deployments as well as the option for a Hybrid Deployment.
