

Dynamics 365 Business Central

2021 release wave 2
 October 2021-March 2022

In this guide, you will be able to learn the most important things about this release wave.

Top things to know

Release overview

Dynamics 365 Business Central is a comprehensive business application solution that is designed and optimized for small and mid-sized organizations. For 2021 release wave 2, Business Central investments center on helping users to get to productive usage faster, whether they are new or existing customers. We expand the built-in tours to cover more standard entities for better onboarding of additional business roles. We continue our Better with Microsoft 365 investment by bringing further capabilities to the Business Central and Teams experience. Finally, and not least, we continue our rapid expansion to more countries. In 2021 release wave 1, Business Central added 13 new countries. In release wave 2, we expect to announce availability in more than 10 new countries.

Some examples of our investments in various investment areas:

Administration: In 2021 release wave 2, Business Central delivers a new capabilities to simplify and improve the way our partners administer tenants. Administrators enjoy new experiences for managing licenses and permissions.

Application: You can now get better explanation and guidance on errors that are caused by problems in posting setup and dimensions. Improvements to reporting, bank reconciliation, and supply chain capabilities will also help customers be more productive.

Better with Microsoft 365: Share a record from the browser client in Microsoft Teams

Country and regional: We continue our rapid expansion in more countries with 10+ new markets in this release wave.

Development: We continue to deliver new capabilities for developers.

Governance and administration: This wave adds more operations in the Operation log section of the Business Central admin center.

Modern Clients: We improve the discoverability of reports across departments by applying a filter to the links that are shown in the Role Explorer.

Onboarding: Built-in tours cover more standard entities to support the onboarding of more business roles. A new help pane will help users get unblocked faster when they experience an issue.

Service and platform: We continue our effort in improving the performance of Business Central.

Dynamics 365 Business Central

2021 release wave 2

October 2021-March 2022

What's new and planned

Country and regional

Expansion to more countries is achieved through partner-led localization. Our partners create the relevant localization apps that are published to AppSource. In combination with the built-in language offerings, Dynamics 365 Business Central is then available to serve customers in 50+ countries World-wide.

Application

For Business Central 2021 release wave 2, we have reviewed the most popular requests for improvement. We'll invest in better reporting, better management of dimensions, and several improvements to the supply chain area.

Better with Microsoft 365

In Business Central 2021 release wave 2, we invest in better integration with Excel. We also further improve support for collaborative business processes in Teams so that you can bring Business Central pages into a Teams channel.

Microsoft Power Platform

With Business Central 2021 release wave 2, we improve the integration with Microsoft Dataverse. We also enhance the integration with the Microsoft Power Platform with support for workspaces in Power BI.

Modern Clients

Business Central offers an extensive portfolio of clients so that users can achieve more at their desks, at home, or on the go. With users across a diverse range of business roles and proficiency levels, and with local and accessibility needs, we are committed to make sure that the user interface is both intuitive to start with and powerful when needed.

Your voice matters: We assess feedback across numerous community channels at a regularly cadence, and we run user studies. Based on this research, we have identified client enhancements for 2021 release wave 2.

Onboarding

Business Central 2021 release wave 2 brings continued improvements to the onboarding experience for Business Central. We add more teaching tips, building on the framework that was introduced in 2021 release wave 1. We improve the checklist experience to add support for business process tours, and we enhance the framework to add support for partners and ISVs to automate the onboarding for their specific solutions.

Governance and administration

2021 release wave 2 delivers a set of admin and governance capabilities that are designed to help administrators and IT professionals set up, secure, manage, govern, and monitor customer environments.

Development

Continue our investments in a rich spectrum of extensibility tooling capabilities for developers, including making the AL language even stronger, that provide developers with a great experience.

Service and platform

No matter the industry type of a small or medium-sized business (SMB), business users expect a dependable service and platform that they can run their business on.
